

Practice Connect

Connect with your patients wherever they are with Practice Connect. This app is completely personalized to meet the needs of your office and patients. Practice Connect lets you communicate with your patients in a way never seen before.

The *[Your-Practice-Name-Here]* App

Let your personality shine through your app. This isn't a generic app made for anyone and everyone. Each Practice Connect app comes customized to your exact needs and wants. Determine your app's name, look, and content all while keeping in contact directly with your patient's smartphone or tablet device.

Spread the Word

Practice Connect allows you to easily spread your practice's message from one patient to another. Let your patients refer other potential patients right from their phone, and optionally reward patients for these referrals. Prospective patients can even use your app to learn about doctors, staff, your facility, and treatment information.

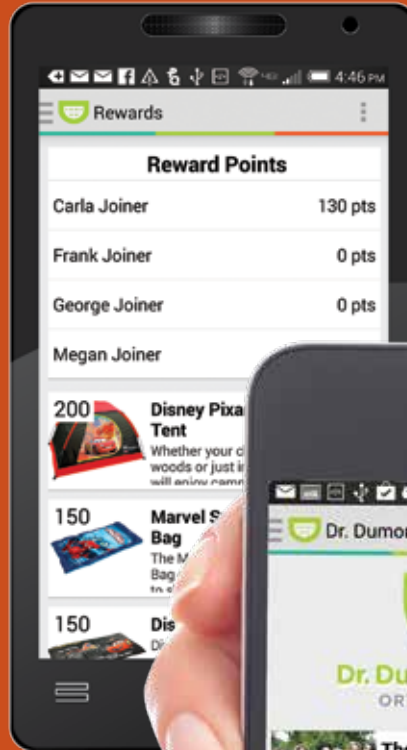

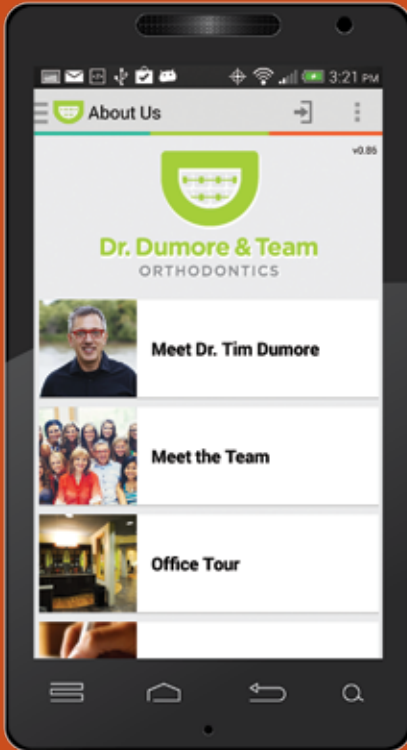

Innovation

Ortho2 provides the first personal-app-based marketing tools created by a practice management developer. Practice Connect isn't just a great new marketing tool, it's also a top-notch way to streamline the process of orthodontic work for your patients. From being able to share office news, to GPS based sign-in, allowing you to free up your sign-in station, to checking appointment times, images, and even making payments. Practice Connect has it all.

Communication

This app allows your practice to send notifications to patients about treatment reminders, promotions, or any other message desired. Patients can customize how they receive reminders, and even message your office directly. With Practice Connect rest assured that your patients are heard.

“I’m very excited to incorporate Practice Connect into our office. What a fantastic way to interact with our patients, as well as for them to see how their treatment is progressing. This marketing tool will greatly help get our name out to those looking for an orthodontist in the area.”

– Dr. Tim Dumore, Winnipeg, Canada

Practice Connect

An exciting new way to keep in touch with your patients on their smartphone and tablet devices for Android and iOS. Practice Connect is meant for a practice of any size. On top of all the features Edge itself has to communicate with your patients, Practice Connect now allows you to cater to those patients with an app fully designed from the ground up, with you in mind. Your practice in the palm of their hands. Practice Connect.
